### Science On Stage

Science on Stage returns to Stony Brook in partnership with Collaborative for the Earth and the Alda Center for Communicating Science. This year, three professional playwrights will each engage with a Stony Brook University researcher working on climate change. From these conversations, the playwrights will create three short plays about the research or the life of scientists. The resulting plays will be publicly presented by top professional actors, followed by a panel discussion with the playwright/scientist teams. Please register using the QR code below or via the [C4E Events](#) page.

4 pm | Monday, Oct. 28
